RE: TRA Docket No. 03-00585

Dear Bill:

On behalf of the CMRS Providers, I am submitting this letter as a follow up to the Status Conference held earlier today at the Tennessee Regulatory Authority ("TRA" or "Authority") in the above-captioned matter. As you know, the Authority's Rules of Practice and Procedure require that all responses to interrogatories be "signed under oath." Moreover, according to said rules, upon the request of the Hearing Officer, discovery responses shall be filed with the Authority. In the March 2, 2004, *Order Establishing Procedural Schedule*, the Hearing Officer ordered that all discovery responses in this matter be filed with the Authority. After a brief, preliminary review of the TRA's Official Record in this matter after the Status Conference, we were unable to confirm that all of the Coalition's discovery responses are in the Official Record.

Accordingly, and consistent with today's Status Conference, we await the formal filing from the Coalition of both a certification that all Coalition discovery responses have been filed with the Authority and a verification oath. If all Coalition discovery responses have not been filed with the Authority, consistent with today's Status Conference, we are again requesting that the Coalition supplement the Official Record in this regard.

We appreciate your cooperation.

Very truly yours,

Melvin J. Malone
